

Uria Graiver

Senior UX/UI Designer

ABOUT ME

Senior Product Designer with a strong UX/UI focus and 5 years of experience designing customer-facing platforms, self-service journeys, B2B systems, and AI-driven product concepts. Skilled in translating business and product requirements into clear user flows, polished interfaces, and scalable design solutions, while collaborating closely with product, development, client, and design teams.

EXPERIENCE

2022 – Present

UX/UI Specialist – Amdocs

- Lead end-to-end UX/UI flows for complex enterprise and telecom products, from early concept and product definition to detailed design and implementation support.
- Design customer-facing platforms, self-service journeys, B2B portals, and AI-driven product experiences within large-scale enterprise systems.
- Translate business, product, and technical requirements into clear user flows, high-fidelity UI, and scalable design solutions.
- Shape new product concepts and visual directions, helping stakeholders understand, validate, and move ideas forward.
- Design and adapt component-based solutions in close collaboration with design system and development teams to support consistency and scalability.
- Partner closely with product managers, developers, clients, and design teams to align user needs, business goals, and implementation constraints.

2017 – 2022

Exhibition Designer - Tamooz Marketing Communication

- Designed commercial and digital exhibitions, brand experiences, and interactive spaces for international clients, managing the process from concept through on-site supervision to delivery, ensuring both visual impact and seamless user experience.
- Developed cohesive brand experiences that balanced aesthetics with functionality, enhancing visitor engagement and establishing exhibitions as leading industry attractions.
- Collaborated with clients and cross-functional teams to translate business goals into immersive, user-centered spatial and digital designs, including detailed production planning and cost estimation.
